# eSIGNz App Signature Capture

## eSIGNz App SUMMARY

The eSIGNz App allows for digital signatures, text, and check boxes to be added to any document workflow. Input, output, signature location(s), text, and check boxes are entirely customizable to fit your business process.

Signatures can be captured and the completed document printed, archived or emailed using almost any iOS or Andriod smartphone or tablet with a web browser. eSIGNz also supports many of the popular signature pads, including Topaz. and Evolis Sig.

### ABOUT eSIGNz App

eSIGNz is a Minisoft developed App for capturing digital signatures on critical business documents such as bills of lading, customs documents, and purchase orders.

The eSIGNz App was developed using activeFORMz, Minisoft's new platform for creating form-based applications that extend the capabilities of eFORMz.

# HOW DOES IT WORK?

Signed documents are easily saved as PDF's to the eSIGNz built-in archiving facility or can be automatically submitted to an organizations existing document management system like Docuware, Sharepoint, OpenText or DocLib.

eSIGNz can also email a signed document to one or more recipients.
